Dear Member

Linked to our website www.nzbowentherapy.org.nz we have a facebook page, where we can communicate with the public. The more people know about us, the better! However, there are a few do's and don'ts when it comes to using facebook.

1. There is the public page, which is visible to everybody. There are administrators, who are part of the Executive committee, and they can write and post articles under the name of the Bowen association. They can also edit posts that are placed by other persons, and place ads or promote posts.
2. We have a closed practitioner group, which is not visible to the public. This page is designed for registered practitioners of our association to communicate and share topics and issues, that might be of interest to the whole Bowtech community. You can search 'Bowtech practitioners' in the fb search, and ask to join. After the admin group has admitted you, you will be able to communicate with the others in that group.

If you wish to publish an article or a story, please send it to one of the administrators (Mark Palmer, Inga von Benzon, Christine Bull) for verification. We will then decide whether it is suitable for publishing.

Please don't start discussions on the public site, as this is designed to function purely for marketing and promotion purposes. That's what the closed group is for! Any technical or practical questions or cases you like to share or discuss, can be voiced on this page.
